

29/04/26

Alumni Talk: High Performance Computing

The Department of MCA organized an alumni Talk by Mr. Punith M on 29/04/2026 for MCA students. The session was delivered by Mr. Punith M, HPC-Engineer, Graviton Research Capital LLP. He has good work experience in different position such as Software Engineer, ATOS Global India Private India Ltd., Project Associate-I, Indian Institute of Science, Instructor, Malnad College of Engineering. He shared his valuable experience on current industry trends, essential technical and soft skills required for the industry.

The talk was highly interactive, and students actively participated in discussions. To make the session more engaging, the resource person conducted a question-and-answer section related to the high-performance computing and readiness for the industry.

The session helped students gain clarity about career paths, preparation strategies, and industry expectations. Overall, the program was informative, motivating, and greatly beneficial for the students.
