3.	Debate on "Entrepreneurship or Job- What should engineers opt for"	Helped students to develop critical thinking skills that are essential in being an entrepreneur	24 th August 2021	 
4	Short Video on Life of Campus Entrepreneur	To motivate students towards Entrepreneurship	24 th August 2021	
5	Write case on Successful Startup Founder		24 th August 2021	<p>An Entrepreneur is "one who undertakes leadership, finance and business acumen in an effort to transform innovations into economic goods." A risk taker who transforms an idea into a successful business enterprise with a vision.</p> <p>ME RIISE had the privilege of journeying with Mr.Girish Ramanna, co-founder of QSpiders & JSpiders as he narrated his success story.</p> <p>Mr.Ramanna, through his student days always dreamt of being a successful entrepreneur. A student from Mandya, completed his BE in Mechanical Engineering from NIE, Mysore. He started various small ventures during his academic life which were small successes which re-enforced his dream of being an entrepreneur. After his engineering, he was recruited as a Test manager in RedQ, then in Wipro as a Project Manager, before being recruited as a Senior Test Architect for JAVA in SUN Microsystems in Netherlands.</p> <p>During his tenure of multiple jobs, he helped numerous people from various backgrounds to find jobs for free by training them in necessary fields. Once, on his flight back to the Netherlands, he encountered one of his former students who thanked him profusely for the help he had rendered them and that it was the reason for the boy's success. This had a severe change of perspective for Mr.Ramanna. He decided to quit his job and do something big in his life that will impact the lives of many people for the better.</p> <p>Thus, began the exciting journey of Test Yatra Software Solutions which was founded up from ground up to 2500 employees with products that are used in the industry even today. A very seasoned executive leader, he was even the founder of QSpiders, JSpiders and Flagroot.</p> <p>A little information on QSpiders and JSpiders.</p> <p>QSpiders is the world's ace software testing training organization with an aim to bridge the gap between the demands of the industry and the curriculum of educational institutions. It is the world's largest software training organization. It is the only organization and has trained around 5.2 lakh Engineers on Software.</p> <p>JSpiders is the sister concern of QSpiders, is a JAVA development training organization with a slogan "JSpiders is a place where businesses find talent and dreams take flight."</p>
